

INVITATION – STAR USER CONFERENCE - SINGAPORE

Venue: Novotel Clarke Quay, Singapore. For details see <http://www.novotelclarkequay.com/>

Date: Tuesday, 26 March 2019 - Wednesday, 27 March 2019

Time: 09:00 AM - 05:00 PM (SGT)

OBJECTIVE

Star Information Systems has arranged user conferences almost every year the last two decades. The conferences have been an event where we have presented products news, gazing into future releases, discussed product improvements and not at least customers sharing experience.

For the first time, we will arrange a separate conference in Singapore. We hope you have the time and opportunity to join the conference and share your experience with the Star software with the other participants. You will also get updated knowledge about the products news and extended functionality which may be useful for your organization. In other words, you will learn something useful!

Star Information Systems is continuously developing and improving our existing products as well as working on new products to meet what we believe is the software the maritime industry needs in the future. At the conference, you will have the option to influence the future product functionality and user interface.

A handwritten signature in blue ink, likely belonging to a representative of Star Information Systems.
